SUMMARY

Subject matter of the dissertation: Tenization of economic activity and its impact on economic security.

Author of the master's dissertation: Sauvov Ismail Krymkhanovich.

Scientific supervisor of the master’s dissertation: V.A. Nikolaev.

Customer organization:

Topicality of the research: The problem of the shadowing of economic activity and its impact on economic security is still insufficiently explored, especially regarding the negative and positive impact of the shadow economy on the economic development of individual regions and the country as a whole, ensuring economic security, as well as a set of management decisions to counteract this negative phenomenon, which determines the relevance of the study.

Objective: The aim of the study is to study the shadow economy as an economic phenomenon and to develop directions for combating it as a threat to the economic security of the region.

Tasks:
- to study the basic theoretical approaches to determining the essence and factors of shadow economic activity;
- to conduct an analysis of the theoretical and methodological approach to assessing the state and scale of the shadow economy;
- to assess the state of the shadow economy in the Republic of Dagestan and its impact on the economic security of the region;
- assess the impact of regional policies on the effectiveness of counteracting the expansion of the shadow economy in the Republic of Dagestan;
- consider a nation-wide system of measures that helps to reduce the scale of the shadow economy and propose directions for its improvement;
- to propose organizational and economic measures to develop mechanisms for the deteniization of economic activity in the Republic of Dagestan.
Theoretical and practical significance of the research: Theoretical significance of the research is that the provisions formulated in the work can complement the knowledge in the field of ensuring economic security in terms of organizing counteraction to the shadow economy. The practical importance of the research is determined by the fact that its main provisions and conclusions have a practical focus and can be used in the system of state administration at the regional level in developing and improving subprograms for legalizing the shadow economy and improving the economic security of the region.

Results of research: Based on our information collection, processing and analysis on the basis of the system of indicators characterizing the state of the shadow economy of the Republic of Dagestan in order to identify threats to the economic security of the subject of the Russian Federation and as a result of the conducted research, we can conclude that the scale of the shadow sector of the Republic of Dagestan is very significant and we fully agree with the assessments of various experts that the volume of the shadow economy of Dagestan varies by industry and sphere of activity from 40% to 90%, but at the same time we note that the republic has a significant tax potential that can be realized through legalization of the shadow economy of Dagestan, which should be the first strategic task of the economic policy of the republican authorities when transferring the economy of Dagestan to a model of sustainable development and ensuring budget self-sufficiency.

Recommendations: Along with measures aimed at replenishing the taxable base and strengthening tax administration, it is necessary to create an effectively functioning business support system and introduce models for simplifying business procedures, in order to increase the investment attractiveness of not only the subjects of the economy of the republic, but also the republic of Dagestan itself.
