Author: Dzantemirov Islam Albertovich.

Supervisor of studies: Efimova E.V., candidate of economic sciences, associate professor, chair of innovatics, management and law.

Customer organization: FSBEI HPE “PSLU”.

Topicality of the research: Creation and development of the forms of integration between state higher educational institutions and commercial organizations serve as the prerequisite of the development of the country’s human capital and knowledge-intensive types of economic activity. At present in Russia there exists a huge economic and scientific potential which is now used in a small degree compared with developed countries which acts as a limiting factor of the innovative economic development. In this connection the subject matter of the research is seen as quite topical.

Objective of the research: Development of theoretical principles and practical recommendations on the development of integration between higher professional education and business as direction of the state innovative and educational policy.

Tasks:
- to give a precise definition of the essence of integration between higher professional education and business as directions of the state innovative and educational policy;
- to examine the legal foundations of the interaction between higher professional education and business;
- to study the forms of the organization of the interaction between higher professional education and business;
- to study the forms of the interaction between higher educational institutions and business abroad;
- to conduct the analysis of the practice of interaction between Russian higher educational institutions and business;
-to determine the composition and function of the subunits of higher educational institutions included in its infrastructure of the provision of interaction with business;

-to detect the reserves of the development of integration between PSLU and business.

**Theoretical significance of the research:** is in the discovery of the essence of integration between higher professional education and business, generalization of the experience of foreign and domestic higher educational institutions on the interaction with business structures.

**Practical significance of the research:** is connected with the recommendations on the development of integration between PSLU with the representatives of the business community.

**Results of the research:**

-transition of the country’s economy to an innovative way of development is impossible without the formation of the competitive in a global scale national innovative system. Its creation along with the increase in the demand for innovation on behalf of a large part of industries necessitates the effective interaction between the university science and business as communities.

**Recommendations:** due to the lack of the system of the detection of the scientific elaborations, consulting services and other products of intellectual activity topical from the point of view of business we have offered methods of monitoring the needs of commercial organizations in the interaction with the university. In order to popularize possible directions of PSLU interaction with commercial structures we have designed the model of the special file on the PSLU site where it is expedient to place information on the possible forms of interaction between the university and business.
