Summary

**Subject matter:** Management in the sphere of the realization of the youth policy in the polyethnic subject of the RF of the North Caucasus Federal District (on the example of Kabardin-Balkar Republic).

**Author:** Zhetteeva Amina Zhantemirovna.

**Supervisor of studies:** Astvatsaturossva Maiya Artashesovna, doctor of political science, professor, chair of the creative innovative management and law.

**Customer organization:** Ministry of education and science, KBR.

**Topicality of the research:** The practice of the last decades proves convincingly that in a rapidly changing world the strategic advantages will be won by those states that will be able to effectively develop and efficiently use the innovative potential of the development with the youth being its main exponent. Management in the sphere of the youth policy not only as a result, but as a factor of the construction of public processes, relations and institutes is essential for the development and reproduction of the economic, social, and political system of the society. The thoughtful and consistent state youth policy and the proper system of management is called to secure deign efficiency of the realization of the social functions of the youth, which is the most important factor of the sustainable development of the society and the successful solution of the tasks facing the state.

**Objective of the research:** is to generalize the content and methods of management and realization of the youth policy in the polyethnic subject of the North Caucasus Federal District of KBR.

**Tasks:** 1. to specify the notion of management as a social and organizing activity and consider the main theories and conceptions of management; 2. to consider the legal foundations and management structures in the sphere of the realization of the youth policy in modern RF; 3. to determine the specific features of the management process in ЛИК as a polyethnic subject of the RF and a member of the North Caucasus Federal District; 4. to study of the organs of power securing management in the sphere of the problems of the youth in KBR; 5. to generalize the forms and methods of the work of the organs of power of ЛИК regarding the
provision of the social interests of the youth of the republic as a polyethnic community; 6. to develop the project “Goal. Career. Success”, aimed at the improvement of the effectiveness of management in the sphere of the solution of the problems of the youth at the regional level of KBR.

**Theoretical and practical significance of the research:** is the verification of some categories and notions in the sphere of management, youth policy, management strategies and tactics in the sphere of the solution of the problems of the youth. In the process of work we developed the project “Goal. Career. Success”, whose results can improve the effectiveness of management in the sphere of the realization of the youth policy in KBR.

**Results of the research:** showed that in KBR there is created a system of management in the sphere of the realization of the youth policy. This system is based on the laws and normative-legal acts both in the RF and in KBR. In KBR there functions a special sectoral organ of the executive power-the Ministry of education and science of KBR that makes use of various forms and methods ensuring the social interests of the youth of the republic as a polyethnic community. Quite often these forms and methods of the work of the Ministry fail to solve all the problems in the sphere of the realization of the youth policy. In this connection we have offered certain recommendations.

**Recommendations:** 1. Setting the most priority directions of the management process in KBR that take into account the specific nature of this polyethnic region. 2. Development and realization of the project “Goal. Career. Success” aimed at the lowering of the level of unemployment among the able-bodied youth.
