SUMMARY

Author of the Graduation Thesis: Sarkisova Alla Grigor’evna

Supervisor of the Graduation Thesis: PhD in Economics, Associate Professor, Professor of the Department of Economics, Management and Finance Kilinkarova Sofiya Georgievna.

Contracting Authority’s Details: The Limited Liability Company “Mak”

Topicality of the Research is determined by the fact that recently the focus on the enterprise’s economic security issues has shifted into the sphere of its economic survival in the market environment in this country. This has led to the need for a new, resource-based approach in this area of research – an emphasis on the economic security of an enterprise as a specific resource the possession of which would ensure that the enterprise fulfills its mission and achieves its targets.

This paradigm makes it necessary to solve the problems associated with the elaboration of theoretical provisions for studying the economic security as an enterprise resource, and the development of some practical recommendations how to assess it and provide its integration into the enterprise management system through the creation and improvement of the enterprise security system as a whole.

Objective of the Research: is to give the theoretical substantiation of the enterprise security system as a corporate resource and work out the basis for its development and application in the enterprise’s economic performance by improving the system of management decision making.

Tasks of the Research are:
- to study the system of corporate resources of an economic entity;
- to substantiate the essence of the enterprise economic security as a corporate resource;
- to define the forms of economic security resource implementation in the economic performance of the enterprise “Mak” ltd., to find and give classification of the functional components of the economic security at the enterprise “Mak” ltd.;
- to expose and classify potential and real threats to the economic security of the enterprise “Mak” ltd.;
- to found the development algorithm of the management decision making system in the sphere of economic security at the enterprise “Mak” ltd.;
- to work out a process model of the management decision making development in the sphere of economic security at the enterprise “Mak” ltd. which will take into account the economic security requirements.

**Theoretical and Practical Significance of the Research.**

The main findings of the research develop the theoretical and methodological basis for managing the economic security at an enterprise; they form a comprehensive picture of economic security as a strategic resource of the enterprise and the principles of its management.

The findings of the research can be used to develop a resource approach to the economic security of an enterprise and with the appropriate management of this strategic resource, to develop the theory of economic and safe performance of economic entities. The practical significance of the research is determined by the fact that the findings obtained can be applied to improve the system of management decision making in order to increase the level of economic security at “Mak” ltd. They can also be used in managers’ practical work in different companies and consulting firms that make and support economic and safe decisions.

**Findings of the Research:**

We have studied and defined the implementation forms of the economic security resource in the economic performance of the enterprise “Mak” ltd., identified and classified the functional components of its economic security; we have also systematized potential and real threats to the economic security of the enterprise “Mak” ltd.; we have founded the development algorithm of the
managerial decision making system in the sphere of economic security at the enterprise “Mak” ltd.; we have worked out a process model of the management decision making development in the sphere of economic security at the enterprise “Mak” ltd.

**Recommendations:**

In order to ensure economic security at the enterprise “Mak” ltd., we propose to adjust the existing system of managerial decision making taking into account its security. In particular, the necessary clauses which should be introduced into the decision making process, are the assessment of the available resource of objective economic security, the assessment of the available free resource of subjective security, the valuation of the missing resource of economic security and the choice of a security method.
