ABSTRACT

Theme of the Graduation Thesis: «Development of the subsystem of accounting of material resources (the example, LLC "Technology")».

Author: Maziev Yusup Magometovich.

Thesis tutor: Candidate of Technical Sciences, assistant professor Timchenko Andrey Borisovich

Information about the contracting authority: LLC «Technology».

Relevance of the research topic: analysis of the processes of effective accounting and construction of monitoring systems and analysis of material resources to achieve the efficiency of their use are of great importance. For any financial and economic activity of both industrial and commercial enterprises is characterized by a high degree of dependence on the availability of sufficient material resources. The number of necessary goods depends on the size, structure and nature of the trade turnover of the enterprise.

Objective: development of the automated subsystem of accounting of material resources at the enterprise LLC «Technology».

Tasks:

1. To study the types of material resources of commercial enterprises.
2. To describe the problem of accounting of material resources for commercial enterprises.
3. Analyze the software and hardware of the organization.
4. Explore the organization's business processes.
5. Identify problems in the enterprise information system.
6. To carry out technical design of the created subsystem.
7. Carry out a software implementation.
8. To estimate the economic effect of the implementation of the design solution at the enterprise LLC «Technology».
Theoretical and practical significance of the research: it is possible to use theoretical developments and developed software as a tool for increasing the efficiency of activities for a particular company.

Results of the research: the developed software product meets all modern requirements of Internet technologies, namely:

1. Convenience.
2. The speed.
3. Reliability.
4. Accuracy.

Recommendations: the results obtained and the developed software product are recommended for implementation at small and medium enterprises engaged in retail trade.
