Title: The peculiarity of expression of estimation in young people's discourse

Author: Elvira Kudaeva

Research Supervisor: N.V. Grevtseva

Research Initiator: the English Philology Chair, the Institute of Linguistics, Communicative Management and Information Technologies, PSLU.

Topical Importance: is in the study of estimation and its category in linguistics within the anthropocentric paradigm, the necessity of detailed and complex research of estimating means

Goal: To find out the young people's preferences in using estimating units and structures

Tasks:

1. To analyze estimating discourse and substantiate it as a part of general notion of discourse.
2. To define different language levels in which estimating means are contained.
3. To define the peculiarity of estimating components, display theoretical value and practical applicability. The area of research is emotional estimating units and the peculiarity of interpersonal communication can be taken into account, while teaching English as a foreign language to avoid mistakes in choosing appropriate words.

Results: The results of the research include the detailed analysis of estimating means, their usage in young people's discourse, the preferences in the usage of estimating means.

Implementation advice: the theoretical and practical material of the diploma can be applied while studying or teaching different courses in linguistics, psychology, sociology and also in the practical course of the first foreign language.
