

Abstract

Graduation Level of Proficiency Paper

(Bachelor's degree / Master's degree)

Subject matter: Some linguistic features of Spanish social media chats: didactic aspect.

Author: Aksenova Polina Jurievna.

Supervisor of studies: Candidate of Pedagogical Sciences, Associate Professor of the Department of Spanish Studies and Intercultural Communication Pronchenko Elena Nikolaevna.

Information about customer organization: Institute of Roman and German Languages, Informational, and Humanitarian Technologies, Federal State Budgetary Educational Establishment of Higher Professional Education «Pyatigorsk State University».

Topical Importance: despite the intensive development of Internet communication, the linguistic characteristics of this type of communication have not yet become the subject of basic research and need to be systematized and comprehensively analyzed.

Goals: identify and describe the specific language of the Internet - communication users of WhatsApp Internet chat in Spanish.

Tasks:

- define the Internet as a communication medium;
- describe the main characteristics of Internet discourse;
- classify Internet communication language genres;
- characterize spanish social media chats;
- to consider the characteristic features of style in communication in Spanish on the Internet;
- identify spelling, lexical, grammatical, morphological, semantic and stylistic features of the network language in the WhatsApp chat;
- creating an online site with lexical units and recommendations for using Spanish in chat rooms.

Theoretical value: consists in a significant contribution to the theory of communication in connection with an in-depth study of current trends in the language of Internet communication among Spanish users. In addition, the work makes a significant contribution to Russian Spanish studies, since it explores the

national features of Internet communication and the features of the methods for representing the Spanish network text, reflecting the peculiarity of national linguistic consciousness.

Practical applicability: consists in the possibility of using the results in courses on modern types of communication, in lectures and practical classes in the Spanish language, in theoretical courses in stylistics, as well as in special courses in the theory and practice of intercultural communication, theory of teaching methods.

Results: the final result of our work was the creation of guidelines for writing short messages in Spanish-language chat rooms, as well as a website containing recommendations and all collected lexical units with translation into Russian.

Implementation advice: it is recommended to use the data obtained, including empirical material obtained on the basis of a sample of WhatsApp Spanish-language chat rooms, for organizing the educational process and for independent study of the Spanish language. The work can serve as a methodological basis for developing measures to prevent youth illiteracy.
