

Summary of the final qualifying work

Topic of the final qualifying work: **«Organization of work with youth in the field of strengthening civil identity and patriotism (on the example Of the Committee for youth Affairs of the Republic of Ingushetia)».**

Author of the WRC: **Keligov Muhammad-Bashir Ramadanovic**

Scientific supervisor of the WRC: candidate of pedagogical Sciences, associate Professor of the Department of creative and innovative management and law Davydova E. V.

Relevance of the research topic. The idea of Patriotic education, formed during the centuries-old history of Russia as the unifying principle of Russian society, has now undergone some changes. Today, it should become a core of crystallization, around which young people will unite, with an independently elected, active and Patriotic position, on the basis of which their ability and readiness to participate in actions leading to the prosperity of Russia will be formed.

Patriotic education in Russia began to acquire the contours of the system, and today we can talk about the trend towards the revival of Patriotic education in the education system, which was lost as a result of the course of Perestroika and reforms in the 90-ies of the XX century. Today, the problem of forming the ideals and desire to serve the Fatherland among senior schoolchildren and students remains relevant and requires solving. these problems are mainly addressed by educational institutions and organizations working with young people.

In the strategic document defining the policy in the field of youth, which was called "May decrees", Vladimir Putin noted that the national priority and main task of the Russian educational sphere is "...the upbringing of a harmoniously developed and socially responsible person based on the spiritual and moral values of the peoples of the Russian Federation, historical and national cultural traditions".

Russia as a multinational state at the present stage of development is faced with the task of developing a content of patriotism that will most contribute to the education of Russian patriots of the XXI century, and not to repeat the cut-down versions of patriotism of the past centuries. The idea of Russian patriotism in the conditions of spiritual development of the country should reach a qualitatively new level of interpretation and understanding.

Thus, there are objective prerequisites for the development of socio-pedagogical conditions for Patriotic education of young people, which contain the initial settings, goals, content, tasks, principles, directions, forms, methods, as well as organizational conditions for ensuring the success of activities. The essence of this activity is determined, on the one hand, by the interests and requirements of society, social and state institutions to the individual, on the other – by the interests of the individual, its attitude to issues solved by society and the state.

Purpose: scientific study of the theoretical foundations and practical forms of organizing work with young people in the field of strengthening patriotism and civic identity to develop modern proposals for its improvement.

Research objectives:

- carry out content analysis of the content of the concept of "patriotism" in modern scientific discourse;
- consider the category "civil identity of youth" as a scientific and social definition;
- to clarify the basics of the formation of civil identity and patriotism among Russian youth;
- to determine the socio-political conditions for the formation of patriotism and civic identity among young people in the Russian Federation;
- analyze the activities Of the Committee for youth Affairs of the Republic of Ingushetia in the field of strengthening civil identity and patriotism among young people;
- develop a Project on Patriotic education and development of civil identity of senior schoolchildren of the Republic of Ingushetia "I am a Citizen of Russia".

Object of research: youth as a special social group.

Subject of research: organization of work with young people in the field of strengthening civil identity and patriotism.

The theoretical significance of the research consists in the fact that in it Patriotic education acts as the basis for the formation of civil identity of students, patriotism is considered not only as a concrete historical, but also a universal phenomenon-the material can be used in theoretical and lecture courses on this topic.

The practical significance of the research is that a Project on Patriotic education and development of civil identity of senior schoolchildren of the Republic of

Ingushetia "I am a Citizen of Russia" has been developed, which can be used in the pedagogical activities of educational and other institutions and organizations working with young people. In addition, the research materials can be used in the educational process of schools, universities, in courses of lectures for students of pedagogical colleges and universities, in the system of professional development of teachers.

Approbation. The project on Patriotic education and development of civil identity of senior schoolchildren of the Republic of Ingushetia "I am a Citizen of Russia" will be implemented in the activities of educational institutions of the Republic of Ingushetia in 2020-2025. At the moment, the Project has passed a preliminary examination by the specialists Of the Committee on youth Affairs and is under approval.

Research result.

We have identified criteria that can be applied to the results of civil identity formation:

- creating a historical and geographical image, including an idea of the territory and borders of Russia, its geographical features, knowledge of the main historical events of the development of the state and society; knowledge of the history and geography of the region, its achievements and cultural traditions;
- the formation of the image of the socio-political system – representation on state organization of Russia, knowledge of the state symbols (emblem, flag, anthem), knowledge of official holidays; knowledge of the provisions of the Constitution, basic rights and duties of a citizen orientation in the legal framework of state-society relations;
- knowledge of one's ethnicity, development of national values, traditions, culture, knowledge of the peoples and ethnic groups of Russia.

We believe that the goal of the work, which was to study the theoretical foundations and practical forms of organizing work with young people in the field of strengthening patriotism and civic identity in order to develop modern proposals for its improvement, has been achieved. We have successfully solved the tasks defined in the introduction of this work: we have carried out a content analysis of the content of the concept of "patriotism" in modern scientific discourse; we have considered the category "civil identity of youth" as a scientific and social definition; we clarified the basics of forming civil identity and patriotism among Russian youth.

In the second Chapter of the study, we determined the socio-political conditions for the formation of patriotism and civic identity among young people in the Russian Federation. We analyzed the activities of the Committee for youth Affairs of the Republic of Ingushetia in the field of strengthening civil identity and patriotism among young people, studying the practice of working with young people in the Republic, which allowed us to develop a Project on Patriotic education and development of civil identity of senior schoolchildren of the Republic of Ingushetia "I am a Citizen of Russia". This project is aimed at educating these qualities among young people – residents of the Republic of Ingushetia, creating conditions for the formation of citizenship, high spiritual qualities – love for the Motherland, the Republic of Ingushetia, their villages and cities.
