Summary

Subject matter: The improvement of the practice of the protection of the young people's rights as a component of the process of the realization of the state youth policy at the level of local self-government (on the example of t. Engels)

Author: Atayan Karine Karlenovna

Supervisor of studies: Candidate of historical sciences, assistant professor of the chair of innovatics, management and law D.S. Chekmenyov.

Customer organization: Committee for culture, sport and youth policy of the municipal administration, t. Engels.

Topicality is that:
- the youth constitutes a huge potential for the country and needs of constant support and active involvement in the socio-political life;
- the young people have a number of rights not fully realized in their everyday life;
- there exists a general practice of the violation of the young people’s rights and total lack of the possibility of their protection.

Objective of the research: The development of the directions of the improvement of the practice of the protection of the young people’s rights in the system of the state youth policy.

Tasks:
- to consider young people as a specific social group;
- to determine the meaning, notion and mechanisms of the realization of the state youth policy;
- to concretize the notion and geneses of the young people’s rights and their place in the state youth policy;
- to conduct the analysis of the socio-economic problems of the youth as a specific social group of the population of Engels municipality;
- to study the institutional aspect of the realization of the state youth policy and the protection of the young people’s rights as one of its components at the level of Engels local administration;
- to propose the directions of the improvement of the practice of the protection of the young people’s rights on the basis of project methods in the context of the realization of the state youth policy.

**Theoretical and practical significance of the research:** The materials can also be used both for further research and for the elaboration of the courses for the discipline “System of public and municipal administration”, “Principles of social policy”, etc.

**Result of the research:** Thus, the state youth policy is the main tool for the realization of the young people’s rights. These rights are realized within the framework of the concrete directions of the state youth policy by means of clearly-defined mechanisms.

For a detailed analysis of the problem connected with the protection of the young people’s rights in the context of the realization of the state youth policy we have chosen Engels.

The youth takes a considerable share of Engels’s population and faces the problems typical of the Russian youth as a whole, and the solution of those problems should rely on active involvement of the young people.

**Recommendations:**

To solve the problems connected with the violation of the young people’s rights we have proposed the project of the municipal target program of the protection of the young people’s rights whose framework suggests the idea of the creation of the Society for the protection of the young people’s rights.
